

The CSV (comma-separated values) format can be downloaded. The CSV format contains the values in a table as a series of text lines organized so that each column value is separated by a comma from the next column's value and each row starts a new line. Here's an example:

```
Doe,John,944-7077  
Johnson,Mary,370-3920  
Smith,Abigail,299-3958  
(etc.)
```

A CSV file is a way to collect the data from any table so that it can be conveyed as input to another table-oriented application. A CSV file is sometimes referred to as a flat file. For example, Microsoft Excel can read CSV files. A computer that has Microsoft Excel software will open the CSV file as a Microsoft Excel document.
